DETAILED ACTION

Election/Restrictions

1. Applicant's election of Invention I (claims 62-95 and 97-99) made without traverse in the reply filed on 05/01/2009, has been acknowledged. . Upon further consideration, claims 62-95 and 97-99 are subject to further restriction because they contain the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

I Claims 62-82, 84-86, 89-95 and 97-99 (Invention I), drawn to an analysis-chip comprising at least one reactor including at least one probe-ligand, a region accommodating the probe-ligand and a hydrophobic convex.

II Claims 83 and 87 (Invention II), drawn to an analysis-chip comprising at least one reactor including at least one probe-ligand, a region accommodating the probe-ligand and a convex flow-path.

III Claim 88 (Invention III), drawn to an analysis-chip comprising at least one reactor including at least one probe-ligand, a region accommodating the probe-ligand and a marking system convex.

2. The only technical feature common for the inventions of the aforementioned groups is a reactor comprising a probe-ligand and a region accommodating the probe-ligand. The feature does not contribute any novelty over the prior art (see, for example,

Art Unit: 1797

Figure 1 of Schembri et al., US 6258593 showing reactor 1, 3 which includes substrate region 2 upon which probe ligands are arrays, as is also disclosed in Col. 11, lines 5 plus). Therefore, the unity of inventions is lacking. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. The restriction is required under 35 U.S.C. 121 and 372.
